

Rubber Conveyor Belts  
Food Industry

## Food Industry Conveyor Belts

- Belts made for the food industry. They comply with the international standards for the transport of food products.

RIP Protection /White FDA Conveyor Belt

### CONSTRUCTION AND PROPERTIES

Food belt type are typically are made of 2 or 3 ply construction with cut edges. The carcass is made of synthetic EP fabrics. The cover rubber quality is tasteless and odourless and resistant to animal and vegetable oil. Easy to wash, does not absorb moisture from humidity and is not influenced by microorganisms.

### APPLICATION

Used for transportation of all sorts of foods, such as sugar, meat, fish, bread, poultry, etc. and has also a wide field of application within light material handling.

The belt is non-staining and therefore also suitable for transport of packaging, parcels, etc.

The antistatic properties prevent the outbreak of fires and explosions, and it is therefore suitable for transport of material such as sugar, grain, flour, etc. Suitable for applications, which for safety reasons require a flameproof conveyor belt.

### APPLICATION GROUPS

- Sugar refineries
- Grain industries
- Canning factories
- Chocolate factories and bakeries
- Poultry processing plants
- Meat - Fish
- Flour mills
