

Rubber Conveyor Belts  
RIP Protection

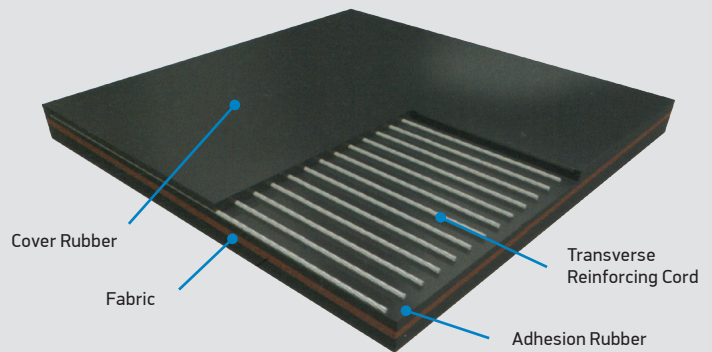

# RIP Protection

## Conveyor Belts

- Excellent rip protection and impact resistance.
- Minimizes damage to belt carcass from sharp objects or strong impact.
- Prevents the belt from being torn lengthwise by sharp objects inserted between the belt and other equipment.

### THE CONSTRUCTION OF THE RIP PROTECTION

- Special, absorbent rubber interlayer (skymmed layer)
- Impact and cut resistant breaker
- High abrasion resistant cover

### APPLICATION GROUPS

- Sand, gravel, stone industry
- Cement, concrete plants
- Heating and thermal stations , garbage incineration plants
- Road construction machinery
- Recycling, compost industry, mineral processing plants
- Timber industry and sawmills
- Steelworks
